

2/10/2019

To whom it may concern,

I'm pleased to provide this letter of recommendation for David Bridges and CNC Manufacturing. I am a general manager of a water truck parts supplier in Melbourne, Victoria. I have been working with David and CNC Manufacturing for four years.

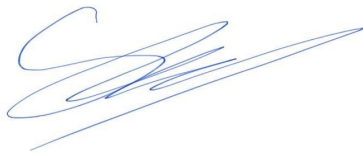

Before 2015, we were sourcing machined parts from China. We had a new product to release, but our Chinese suppliers were unable to meet the required tolerance due to the complex nature of the parts. I met with David after an exhaustive search of Australian machining suppliers. Straight away, I could tell David was passionate about his work and was interested in our whole product, not just the parts we needed him to make.

Over the years, we have forged a strong business relationship with David and his team. To our advantage, we involve them in our products from the design stage. From the beginning of the process, we can design products that are easy and cost-effective to manufacture.

Working with CNC Manufacturing has had many positive outcomes for my business. We have reduced our dependence on foreign markets and taken advantage of the weak Australian dollar in the export markets. CNC Manufacturing uses modern, state of the art equipment, thereby reducing our costs and making our business more competitive.

I do not hesitate to recommend David and his team at CNC Manufacturing. They take pride in their work and are true professionals.

Sincerely,

Simon Jones  
General Manager  
T-Rex Water Trucks - R&L Jones Engineering Pty Ltd
